

July 29, 2020 Chat

16:36:30 From Donald Masterton Australia:
hi all from Australia

16:36:42 From Paul Hannaby:
Hi from the UK

16:36:49 From Gordon Kincheloe Alamo Woodturners:
Howdy everyone from San Antonio/Alamo Woodturners

16:36:59 From Of Course:
Evening from Crescent City

16:41:04 From Bob Silkensen, Virginia:
How do you spell it!

16:42:21 From Dave - Crescent City:
NeJe - laser printer

16:43:06 From Bob Silkensen, Virginia:
Laser Engraver not printer

16:43:47 From Dave - Crescent City:
Thanks

16:49:01 From Dane Chandler -Tucson AZ:
Hello everyone. I would like to take this opportunity to apologize to any
& all
for any of my colorful language last week. I am also regretful for my
expression
regarding ones' piece of equipment. My experience/issues with it could of
been
articulated more professionally, and for that I apologize. Sometimes I
can get
too passionate in what I am talking about and what should have come out
didn't.

16:50:17 From Dave Leader:
Ex military woman owned biz has this device

ype=1&theater

16:55:23 From Gerald Jensen:

Dave Leader ... do you have a link or name of the seller ... link in your chat
was just to a picture.

17:10:07 From Dave Leader:

<https://nmclasers.com/> Nancy A MCentire

17:11:21 From Johnny Hughes:

Nancy is very help and has the best prices on the NEJE lasers

17:13:55 From Gerald Jensen:

Dave Leader ... I prefer to spend my money to support another veteran ... Thanks!

17:22:14 From Larry Canterbury,Ohio:

Where is the best place to get pen kits for freedom pens?

17:22:59 From Dick Meuler - Des Moines, IA:

Nancy's site says NEJE Master 20W Engraver - The machine is not suitable for
engraving best application is for Cutting. What say you users??

17:23:14 From Gary Bobenhausen:

I have gone to Rockler and Wood Craft.

17:23:16 From DougMiller in KY:

I like Woodturningz.com

17:23:39 From Steve Thomason:

<https://worldwidewoodturners.org/>

17:23:56 From Don Wilson:

I got my last pen kits from Craft Supply. Considerable savings.

17:26:57 From Gordon Kincheloe Alamo Woodturners:

Exotic Blanks has great quantity pricing on all pen kits. You can mix and match to get good discounts.

17:27:08 From Dave - Crescent City:

Starting with last week's meeting, the chat is on the website at
worldwidewoodturners.org, and this week's chat will be there too (SMILE)

.

17:28:46 From Steve Thomason:

Thanks for your hard work Dave!

17:30:52 From Dave Leader:

I see higher wattage lasers on Nancy's web site too

17:31:12 From DougMiller in KY:

thanks Dave!

17:36:35 From Jeremy Highers:

at what is the best speed to sand through the grits?

17:37:16 From DougMiller in KY:

<500

17:37:40 From Gerald Jensen:

I sand at 300rpm or less.

17:37:41 From Johnny Hughes:

I usually sand at around 500 rpm

17:40:00 From Donna:

400

17:40:48 From Paul Hannaby:

speed should be relative to diameter. What matters is peripheral speed,
not RPMs.

17:46:55 From Dave Leader:

Put the number of the jaws on the tenon

17:47:39 From Dave Leader:

also the number of the jaw; 1,2,3,or 4

17:53:50 From Dave Leader:

dove tail jaws?

17:56:42 From Joe Metairie LA:
what about grain orientation.

18:10:54 From Dick Meuler - Des Moines, IA:
And NEVER use a faceplate in end grain.....

18:16:19 From Charlie Bundy Grand Rapids, Mn.:
When all else fails read the instructions. Murpys law

18:16:26 From Dave Leader:
Thanks Kim. I have Nova chucks

18:19:23 From DougMiller in KY:
Kim is exactly right. I had a "professional turner" tell me they were all tapered.
I showed him his own jaws and he had to back up and admit he'd been teaching
incorrectly for a number of years. Simple truth, check the jaws to be sure what profile
you need to turn for the best grip.

18:21:04 From Tod Raines:
Better off using larger jaws with a worm screw for larger bearing surface

18:21:08 From Dane Chandler -Tucson AZ:
the old SN chucks (before 2008ish) came with the dovetails....the newer models do not
from what I have seen with folks.

18:22:46 From Tod Raines:
Chuck jaw styles - (outside/inside)

- dovetail/dovetail
- dovetail/dovetail
w/ bird's beak
- dovetail w/ birds' beak/profile (serrated moustache)

18:23:32 From Tod Raines:
Opps second one should be

18:23:41 From Tod Raines:
dovetail/straight w/ bird's beak

18:23:58 From Karl Geary:

Is there a rule of thumb to gauge how big of a piece of wood you can turn on a wormscrew?

18:31:44 From Dane Chandler -Tucson AZ:

I'll volunteer for next week

18:35:28 From Dave - Crescent City:

Good night and thanks

18:35:35 From Dave - Crescent City:

Everyone...
