

16:33:18 From Lou Newell:
hi all

16:34:00 From Donald Masterton Australia:
hi all from down under

16:37:10 From Dane Chandler -Tucson AZ:
hi don

16:37:25 From Billy Dillard Houma, Louisiana:
hello

16:37:39 From Donald Masterton Australia:
hi Dane

16:37:39 From Lou Newell:
I have a gallery item or two

16:38:33 From Josh:
Hi Josh from Lawrenceville Ga

16:41:07 From Paul Hannaby:
I have a gallery item

16:48:40 From James Desbrow:
When was the video done?

16:49:00 From Dane Chandler -Tucson AZ:
last week

16:49:19 From James Desbrow:
Thanks

16:50:04 From Tim Robertson, Dallas, Georgia:
I have two laser engraving/cutting machines. My largest machine
is a 100 watt with a 3'x4' work table with 15" up/down travel.
It can cut 1/2" hardwood. I can cut those disc you were showing.

16:51:34 From Tim Robertson, Dallas, Georgia:
With my large laser I can lay my turned bowls in the laser and
engrave signature and on the bottom.

16:53:53 From Paul Hannaby:
Here's a link to the goblet turning video -
<https://youtu.be/4IBrhKqGuC8>

16:54:18 From Dave - Crescent City:
Thanks for the link

16:56:40 From Arthur Barber:
Is it just me, or is the screen frozen on Tim

16:57:02 From Dane Chandler -Tucson AZ:
its froz3

16:57:03 From Doug Miller:
I have an item

16:58:58 From Jeffrey Schnell:
I have an item

16:59:03 From Galaxy A10e:
I have it to show

17:00:27 From Arizona John:
I have an item

17:01:38 From Chris Parker:
hi eddie chris from uk I got a piece

17:04:42 From Dane Chandler -Tucson AZ:
will call out the folks who have something when eddie gets done

17:05:22 From Bruce from TN to Dave - Crescent City(Privately):
Remember the Oxford comma

17:06:45 From Jim Hurst :
Congrats to Kim! Her videos are great.

17:08:35 From Donald Masterton Australia:
youmaker.org

17:09:44 From John from New jersey:
Kim, loved the cat chasing the squirrel!

17:13:02 From Bruce from TN to Dave - Crescent City(Privately):
And Oxford Comma with everything else

17:13:52 From Joe Breech:
Joe from Traverse City -I have an apple vase to show

17:16:34 From Kim Tippin:
Thank you

17:22:05 From Chris Parker:
<https://www.thebaldwoodturners.co.uk/book-online>

17:24:40 From Jason Collett:
got a ?

17:25:38 From Jim Hurst Eugene oregon:
I got a spoon box and an emerging box tto share

17:26:25 From Dane Chandler -Tucson AZ:
Jason c up next

17:27:44 From Doug Rowe in Arizona:
I'll show a couple things

17:28:30 From Dane Chandler -Tucson AZ:
got ya up next

17:30:46 From Steve Maikell :
look up two piece hollow form
http://www.aawexplo.wwwmi3-ss30.a2hosted.com/aaw_cs1_pdf/AW2103p30-35.pdf

17:31:30 From Bill Wyche Tn:
I have a two part hollow form to show

17:32:02 From Dane Chandler -Tucson AZ:
I got ya bill

17:33:16 From Clint Hoyle:
I only bought like 50 boxes

17:38:55 From Dane Chandler -Tucson AZ:
I'll ya out next mike

17:42:25 From Chris Parker:
chris parker uk got another piece

17:43:00 From Dane Chandler -Tucson AZ:
I got ya chris

17:45:24 From Dan Rozell:
I have a door alarm on my door, \$5 at Harbor Freight.
The noise isn't too obtrusive and doesn't startle me.

17:50:29 From Dan Rozell:
aSloth...lol

17:51:02 From Dane Chandler -Tucson AZ:
yes....a sloth

17:53:46 From Doug Rowe in Arizona:
I'll give a couple tips

17:56:53 From Martin Clarkson:
good to see you all again tonight unfortunately I have a
long day tomorrow so going to have to get off I will catch
you all in a fortnight as I am on vacation next week again
but look forward to next meeting

17:57:18 From Dane Chandler -Tucson AZ:
nitynight martim

18:00:26 From dickstohr:
To clean the lathe bed don't mess up a good chiseeel use a
raiser blade scraper.

18:05:11 From Dick Meuler - Des Moines, Iowa:
Coarse to fine: 2F Pumice, 4F Pumice, Rottenstone, DE powder

18:09:47 From Tim Robertson, Dallas, Georgia:
Good job Kim Tippin. Summary is to use a vacuum chamber to
stabilize wood and use a pressure pot to make castings.

18:10:18 From Kim Tippin:
Thank you, Dick! Perfect!

18:11:43 From Dan:
I think Kim means infuse.

18:12:12 From Jeffrey Schnell:
safety tip also I'm interested in doing the tips

18:12:15 From Dane Chandler -Tucson AZ:
I use DE (40d bag @ pool store is \$10) & BLO as my
"ackes/Hampshire" final sanding process. the grit level I
estimate is 1000-1200grit. works great.

18:12:17 From Doug Miller:
virtuallycrafty.com

18:13:07 From Doug Miller:
link is for a virtual craft demo Saturday and Sunday

18:16:30 From Gerald Avery, Winter Haven, Fl:
thank you all good night

18:16:37 From Dan Rozell:
Eddie, Dane and everyone else - I want to thank you for this ! I am an inspiring woodturner. I have been watching and reading all I can for the last few months. Joined a local club, though are shut down currently. I have only owned my lathe for a week, but have done a lot of practicing, hope to produce something soon...lol This group has added an additional dimension to my education, I have many notes. Unfortunately, I live real rural and cannot share video or audio with my poor internet connection, so please excuse me for only using the chat window.

18:17:58 From Dane Chandler -Tucson AZ:
Dan, you can contact me anytime! daneatdfa@gmail.com 520.904.2792

18:19:01 From Dave Leader:
PVC pipes for a mold can be very difficult to turn

18:19:53 From Clint Hoyle:
Folgers coffee, too

18:20:03 From Clint Hoyle:
is in hdpe

18:20:30 From Steve Maikell :
walmart has cheap silicone ice cube or chocolate molds to use

18:20:53 From Dan Summers - Columbus Ohio:
hdpe is a recycle # 2

18:22:22 From Dan Summers - Columbus Ohio:
polypropylene is a recycle # 5

18:22:49 From Doug Miller:
I have another gallery piece of we need it

18:23:05 From Dane Chandler -Tucson AZ:

dont use SOLO cups! found out the hard way

18:23:10 From Dan Rozell:

My wife pours extra resin from her crafts into silicone
coaster molds

18:25:20 From Roger Carter:

I HAVE A GALERY ITEM

18:25:38 From Clint Hoyle:

Dane, what do you know? I had some trouble couple times,
when I mixed 5-minute epoxy in plastic cups...

18:27:30 From Dan Rozell:

ouch

18:28:32 From Dick Meuler - Des Moines, Iowa:

True oils and evaporative finishes (lacquer, shellac) never
skim over. Only reactive finishes skim from oxygen exposure.
That's why turning the can over prevents oxygen from getting
to the finish closest to the lid.

18:28:36 From Clint Hoyle:

for me, I was mixing in those clear water cups... the epoxy never hardened

18:32:04 From Dan Rozell:

Thank you all !!!

18:32:11 From Clint Hoyle:

well, to clarify... it was mixed in the right ratio, but the
epoxy hardened into a grainy texture..

18:32:12 From Dave - Crescent City:

Good night

18:32:15 From Dan Summers - Columbus Ohio:

Goodnight

18:32:16 From Kim Tippin:

goodnight
