or align headstock and tailstock with leveling

18:23:30 From Stanley Keenum:  
Eddie, thank you for your view regarding information  
on the web. You articulated my view almost to the word.  
It has always seemed a little hypocritical for a club  
(and almost all of them have a mission statement stating  
that they were there to educate public regarding  
woodturning) for them to state that and then not share  
club demos and recordings, etc.

18:28:03 From Matt Harber:  
I have to leave. Thanks everyone! Have a great night!

18:28:25 From Kade B:  
cheers Matt

River Ridge Wood Stabilizing

18:36:05 From Stanley Keenum:  
I am NOT bashing turning clubs. I realize that they are  
paying members and may not want to “give away” the perks  
that come from annual fees. Please consider every week during  
this meeting that person after person mentions Mark Sillay and  
his wood slicing demos. All these guys saw him because  
progressive clubs DO share their information and there are  
many of them that share (thankfully). Zoom was not heard of

before the pandemic and now it is in almost everyone's life.  
Thanks to all that make this possible.

18:36:27 From Kade B:  
you're fine. didn't hear a thing Kim!

18:36:56 From Dane Chandler -Tucson AZ:  
well said Stanley

18:37:57 From Of Course to Tres Lennep(Privately):  
Tres, Is it alright if I leave up old videos from you?

18:38:04 From Bob Grinstead - Mansfield, TX.:  
Eddie these meetings are great. Lots of information out here.

18:42:26 From Andy Schuster:  
Well, good night everyone. Thanks again for a really  
great, informative meeting

18:45:21 From Kade B:  
mineral oil never dries fully though.

18:45:44 From Jake:  
assuming you have roughed out the bowl properly  
meaning even thickness from rim to base. I would  
just then seal with Anchor seal inside and out.  
Put it away and forget it for a year. A lot times,  
rough outs crack because they have uneven thickness.

18:53:15 From Chuck Slattery:  
hitting the bed folks thanks for all the info
