trend diamond stone 300/1000 grit

16:34:01 From Dick Meuler - Des Moines, Iowa:  
All you really need is a square piece of wood that  
you put one corner in the pocket and push the arm  
in until it meets the wheel. You can have different  
dimensions for various grinds. Works all the time  
with no muss or fuss. Masonite works and is what I use.

16:34:14 From Dave Leader:  
my card is 400 and 1000

16:34:46 From Dane Chandler -Tucson AZ:  
trend has diamonds embedded in nickel/steel.

16:35:50 From Dane Chandler -Tucson AZ:  
avoid DMT diamond stones as they are diamonds on  
a poly film and wear out/peel off the metal backer.

16:35:56 From Dick Meuler - Des Moines, Iowa:  
The raptors need a specific base to wheel center distance  
to get the angle specified on the individual raptor template.
