To expand your usage of the laser, if you want to  
laser clear glass, first paint the glass with Rust-oleum  
Cold Galvanizing Compound. Laser it and then wash away  
the galvanizing compound. Your text/picture will be left  
behind.

17:05:26 From Matt Harber to Everyone:

\*Titebond.

17:06:00 From Bob Grinstead Mansfield, TX. to Everyone:

TB sets up fast. I use it for open segment turning

17:06:36 From Doug Miller in N KY to Everyone:

Matt, will the tite bond stick to the brass tubes?

17:06:42 From Kade Bolger, Woodturner to Everyone:

Me too Matt. It's great stuff!

17:08:31 From Andy Schuster to Everyone:

lol another glue to try on the pens I make, and I just bought a big bottle of gorilla glue. really liked that for gluing brass into the blanks

ROUGH UP THE BRASS TUBE THEN PARFIX 3408 NEVER COMES LOOSE

17:11:31 From Matt Harber to Everyone:

I don't know about the Titebond Thick & quick, if it will stick to pen blanks. I suppose it should.... but it's not epoxy, either. Seems like it works well, though - I've never had it fail.

17:12:16 From Matt Harber to Everyone:

Kade, you use the Titebond Thick & Quick? On what? How?

17:12:56 From Andy Schuster to Everyone:

3408 seems to thin for the tubes for me, never had luck using it for the tubes. its my preferred finish for the pens though. one coat only then buffed with the vonex

17:13:04 From Gerald Jensen to Everyone:

I use Thick & Quick on open-segment pieces.

17:13:09 From Kade Bolger, Woodturner to Everyone:  
Just as a quick set glue for inlays. I've never used it on  
pen tubes

17:13:17 From Matt Harber to Everyone:  
Thanks!

17:13:46 From Matt Harber to Everyone:  
What happens when you turn across that glue? I've never tried  
that before...

17:14:29 From Kade Bolger, Woodturner to Everyone:  
I use gorilla glue on my pen tubes. I haven't had one come loose yet

17:14:32 From Susan's iPad to Everyone:  
Parfix 900 is what Mark Sillay gave me for the tubes.

17:14:33 From Gerald Jensen to Everyone:  
Never had a problem ... just be careful. I think a couple of my  
pieces will be in Eddie's gallery tonight.

17:15:25 From Dane Chandler -Tucson AZ to Everyone:  
thick & quick is better than liquid nails

17:15:31 From Andy Schuster to Everyone:  
lol,Mark turned me onto the gorilla glue Susan

I was having problems with deer horn blanks slipping on  
the brass tubes, stared using Gorilla Glue, haven had a  
problem since

17:18:52 From gary hoffman arizona to Everyone:  
ANY OF THE GLUES MENTIONED WILL WORK..THE KEY TO STICKING AND  
HOLDING IS TO ROUGH UP THE TUBE WITH SANDPAPER FIRST FOR A TIGHT HOLD

17:18:55 From Andy Schuster to Everyone:  
I used to like those videos show, but lately, gorilla glue, wet  
hole In blank with qtip and water, glue blank,insert, I let cure  
overnight
