Topic to discuss: an email to the club ... From: Vincent Kruszynski
Subject: Blank donation

A customer of mine, Larry Morgan has been advertising this great cause on a Facebook page. I explained to him I will not be able to turn pens but I make blanks and I am willing to donate 20 of my special pour resin blanks to a great cause. I only need the address to ship them too. Thank you.

16:29:51 From Dave Rhodes - Crescent City to Everyone:
How should we answer

16:33:45 From Dane Chandler -Tucson AZ to Everyone:
hi GrisW, welcome

16:34:31 From Dane Chandler -Tucson AZ to Everyone:
if you have an item you'd like to show out it in chat! we'll get a couple in before the demo

16:35:03 From brenda thornton ohio to Everyone:
i can do pens and would love to help.

16:36:45 From Martin Clarkson to Everyone:
I will show one buddy get the ball rolling

16:37:25 From Stephen Makuka to Everyone:
Hi All, I just took delivery of my new Powermatic 3520C lathe. I've got the legs on the bed but need to move it into my shop and assemble the headstock onto the bed. Any ideas on moving 700+ lathe and lifting the headstock? Thanks, Steve in NJ

16:38:07 From Dane Chandler -Tucson AZ to Everyone:
engine hoist

16:38:25 From Dane Chandler -Tucson AZ to Everyone:
for the headstock or a couple buddies

16:38:48 From Scott Hampton-Visalia-CA to Everyone:
Helps to move it into the shop 'before' putting the legs on it.

16:39:03 From Ken Poirier to Everyone:
Small chain fall

16:40:27 From Ken Poirier to Everyone:
For headstock

16:40:48 From Joe Channey to Everyone:
Harbor freight engine hoist works for that large wood pieces.

16:40:59 From Scott Hampton-Visalia-CA to Everyone:
Offer a few friends a six pack if they help.

16:41:48 From Charlie Bundy Grand Rapids, Mn. to Everyone:
Don't give them the six pack till they're done

16:41:56 From Doug Miller in N Kentucky to Everyone:
I do have a couple pieces for gallery

16:42:28 From Dave Kingsley - Lakewood NY to Everyone:
I have a piece to show.

16:42:35 From Stephen Makuka to Everyone:
Thanks guys. It may take more than six beers ...

16:43:00 From Scott Hampton-Visalia-CA to Everyone:
A six-pack each.

16:43:32 From Ken Poirier to Everyone:
Move bed and legs separately to shop. Assemble upside down or
on side. Block legs and move to upright. (May need a friend.)
then add headstock.

16:44:39 From Tom Rooney to Everyone:
Can someone do a demo on all the various finishes.

16:48:41 From Scott Hampton-Visalia-CA to Everyone:
Tom, that will take a few months to show, lol.

16:50:08 From Dane Chandler -Tucson AZ to Everyone:
an actual demo or a discussion on finishing?

16:51:15 From Andy Schuster to Everyone:
lol both, everyone has their own preferred finish and technique

16:51:19 From Tom Rooney to Everyone:
.a discussion.

16:52:00 From Rick Tucker to Everyone:
I have something to show

17:23:45 From Dave Rhodes - Crescent City to Everyone:
What is 8 quarter wood and 5 quarter wood mean?

17:24:10 From Dave Rhodes - Crescent City to Everyone:
was that diameter?

17:24:13 From Bob Texas to Everyone:
8 x 1/4"

17:24:18 From Dave Rhodes - Crescent City to Everyone:
Ok

17:24:21 From Robert Hodge - Houston,TX to Everyone:
4 quarter wood or 4/4 is approximately 1in

17:24:34 From Dave Rhodes - Crescent City to Everyone:
Oh

17:24:48 From Ken Poirier to Everyone:
Rough sawn wood a quarter = 1/4"

17:24:54 From Scott Hampton-Visalia-CA to Everyone:
8/4 wood is two inches thick.

17:25:12 From Dave Rhodes - Crescent City to Everyone:
Ok

17:25:27 From Andy Schuster to Everyone:
rough cut wood is measured in 1/4s 4/4 is one inch 5/4 is 1 1/4 inch 8/4 is 2 inch

17:25:44 From Dave Rhodes - Crescent City to Everyone:
Thanks

17:26:11 From Ken Poirier to Everyone:
If 4/4 is planed both sides finish thickness about 3/4-13/16"

17:28:12 From Scott Hampton-Visalia-CA to Everyone:
Can you show a more detailed look at the vacuum chuck and how it attaches to the scroll chuck without leaking vacuum pressure.

17:28:31 From Cap'n Eddie to Everyone:
Mother board fried, Nancy thinks it was from a software overload. I was having a problem with LaserBurn, did better with NEJE and somehow they were talking. Not agreeing. I have found boards for Master 2S, not sure if will work with a Master 2. I've contacted NEJE but no response. Just trying to save this for a few months.

17:28:36 From Dane Chandler -Tucson AZ to Everyone:
it's not a vac chuck

17:30:16 From Cap'n Eddie to Everyone:
I think this may be difficult with a vac chuck, unless you design you own base and can adapt to the surface changes.

17:30:19 From Scott Hampton-Visalia-CA to Everyone:
ok, thanks Dane.

17:31:52 From Scott Hampton-Visalia-CA to Everyone:
I took a class with Doug Fisher and he showed me how to do this with a vacuum chuck. That's how Doug does it.

17:32:05 From Matt Harber to Everyone:
I would suggest, Cap'n Eddie, that a vacuum chuck offers the same (or better) capability to move and offset pieces. My vacuum chucks look similar to Bob's headstock fixture, and you can make them bigger if you want.

17:33:23 From Matt Harber to Everyone:
Would faster speeds work better, due to the "air turning"?

17:33:32 From Andy Schuster to Everyone:
sorry folks, bad connection, see you good folks next week. thanks for the interesting demo Bob. I'll catch up on youtube

17:33:51 From Cap'n Eddie to Everyone:
Matt, I have several versions of cups. If you ob the back side, or have awkward wood (holes) then this is a good way to hold it.

17:34:28 From Matt Harber to Everyone:
Grin!!!

17:35:11 From Cap'n Eddie to Everyone:
Thanks Donald. I was afraid to even test it. Ii have three different power lasers and would like to expand, but I have to buy a gallon of gas next week, budget is tight.

17:35:30 From Scott Hampton-Visalia-CA to Everyone:
I like using a vacuum chuck so the tailstock doesn't get in the way.

17:35:34 From Mark Inmon Kansas City to Everyone:
On vacuum chucks, anyone has any suggestions on smoke coming from the vacuum pump? It smokes up the whole shop when I use it and has the correct oil level.

17:36:51 From Doug Miller in N Kentucky to Everyone:
Oilless pump

17:37:42 From Scott Hampton-Visalia-CA to Everyone:
If you have a oil vacuum chuck, you can't do anything about the fog they create.
The mineral oil used for lubrication heats up and creates a fog. Only thing you can do in this situation is have really good ventilation.

Thank you Bob for a Great Demo.

17:41:23 From Doug Miller in N Kentucky to Everyone:
I was glad to see Bob use the pinch method to start. I was chastised a bit this week for pinching the cherry bowl blank.

17:41:56 From Matt Harber to Everyone:

LOL! I do a LOT between centers like this...

17:43:05 From Dave Rhodes - Crescent City to Everyone:
Thank you Bob, really great
