17:37:52 From Doug Miller to Everyone:
I have a question about wood for the collective

17:37:54 From Tim Hatch Bastrop, TX to Everyone:
Thanks Matt, and Tres... Much appreciated.. Wife is looking at
doing airbrushes for her gourds and getting a high speed carver...
this will help...

17:38:48 From Bray's Woodturning to Everyone:
Thanks Matt

17:39:54 From Matt Harber to Everyone:
Tim, these dental drills work great for piercing - cutting
bits out. But if you are carving, you might want to look at
the micromotors instead - the super high-speed dental drills
are great at burning and piercing, but don't have the torque
needed to carve.... things like leaves and faces and so on.

17:40:30 From Tim Hatch Bastrop, TX to Everyone:
Thanks Matt good info...

17:42:37 From Clint Hoyle to Everyone:

18:05:11 From Dane Chandler -Tucson AZ to Everyone:

18:07:10 From Doug Miller in N Kentucky to Everyone:
Something reminded me. I saw another technique for applying paint to turned surface. It's not new, but at plying hasn't been used much with turned wood. I'm excited to try it. Could be a demo for us if it works out like I believe it will.

18:07:28 From Steve Maikell to Everyone:
I want to thank Gary Bobenhausen for sending the Freedom Pens for Space Force "Guardians." They appreciate them a lot!

18:16:15 From Scott Hampton-Visalia, CA to Everyone:

□ Dave, My shop is actually in an average sized garage.

Just took me a while to create a space that allows me to fit everything in nicely.

18:16:17 From Dane Chandler -Tucson AZ to Everyone:

yes Clint. that guy was with us originally the he wanted \$\$\$.
sent him packing and we went with .org

18:16:43 From Dave Rhodes - Crescent City to Everyone:

Love our shop Scott

18:17:41 From Dave Rhodes - Crescent City to Everyone:

Typo, Love your shop Scott

18:18:04 From Scott Hampton-Visalia, CA to Everyone:

Dave, if you're ever down in the Visalia area in central California, you're more than welcome to stop in for a visit.

18:18:28 From Dave Rhodes - Crescent City to Everyone:

18:19:30 From Clint Hoyle to Everyone:

Dane, my point... the group should own the .COM also,
and just redirect to the .ORG page.

18:20:16 From Dane Chandler -Tucson AZ to Everyone:

that's an option yes.

18:20:51 From Gary Bobenhausen-Corinth, Texas to Everyone:

We use gulf balls. It does make a huge difference.

18:22:56 From Dean Grimes TX to Everyone:

I have something

18:23:13 From Bob Mansfield, Texas to Everyone:

I made one out if a piece of PVC for the handle on my
Shopsmith quill. Makes drilling a lot easier.

18:29:19 From Doug Rowe to Everyone:

18:38:39 From Bob Mansfield, Texas to Everyone:

I'll have to try that

18:40:46 From jim selby jacksonville fl to Everyone:

night all morning is early tomorrow .

18:43:37 From Dane Chandler -Tucson AZ to Everyone:

skew or a spindle gouge. not a spindle x

18:43:48 From Dane Chandler -Tucson AZ to Everyone:

spindle roughing gouge

18:44:40 From Gerald Jensen to Everyone:

My preference would be a detail spindle gouge

18:44:43 From Tres Lennep, Ocean Springs, Mississippi to Everyone:
Barbara Dill Multi Axis spindle turning. Is a great book on multi axis turning

18:44:48 From Matt Harber to Everyone:
For off center, I usually use deep fluted bowl gouge, detail gouge,
and skew. It is very important to take light cuts, and make them shearing cuts.

18:45:27 From Matt Harber to Everyone:
Agree with Tres - Barbara's book works to do a lot of technical discussion
about how to get specific shapes.

18:46:24 From Tim Hatch Bastrop, TX to Everyone:
Thanks Tres and Mark... Good info will check it out

18:48:05 From Dane Chandler -Tucson AZ to Everyone:
marketing & perception: can I take your money? oh yes please!

18:48:19 From Tim Hatch Bastrop, TX to Everyone:
LOL

18:48:25 From Matt Harber to Everyone:
LOL!

18:49:03 From Dane Chandler -Tucson AZ to Everyone:
then let me add my name, it costs dbl!

18:53:16 From Dane Chandler -Tucson AZ to Everyone:
extra tool/bevel pressure during the cut will also make chatter
marks thru the slicing cut.

18:53:59 From Matt Harber to Everyone:
Plus, you can enhance the chatter by moving your tool rest
further away from the work.... but be careful!

18:54:29 From David j Edwards Michigan to Everyone:
11Good niight ever

18:54:42 From Dane Chandler -Tucson AZ to Everyone:
lol! indeed be careful with that!

18:55:06 From David j Edwards Michigan to Everyone:
bye

18:55:14 From Scott Hampton-Visalia, CA to Everyone:
I figured out how to make some cool chatter on my
spin tops using my skew chisel.

18:55:33 From Matt Harber to Everyone:
I'd love to see that, Scott....

18:55:39 From Dane Chandler -Tucson AZ to Everyone:
yep! I do that also on mine

18:56:05 From Matt Harber to Everyone:
I've done it with my thin parting tool...

18:57:04 From Scott Hampton-Visalia, CA to Everyone:
If you can get your chisel to vibrate safely, then
you can add chatter to almost anything.

18:59:03 From Kade Bolger, Woodturner to Everyone:
Jean-Francois Escoulen from France is the King of
Multi-axis. Amazing. Check him out.

19:03:43 From Doug Miller in N Kentucky to Everyone:
Dark brown wood. Very hard. As I turned it the shavings
were yellow. Any guesses what it might be?

19:04:44 From brenda thornton greenville ohio to Everyone:
mulberry?

19:05:14 From Matt Harber to Everyone:
Mulberry is kind of soft.... Might be Osage orange...

19:05:41 From brenda thornton greenville ohio to Everyone:
yup my second choice

19:05:44 From Matt Harber to Everyone:
Osage becomes brown with time... but the inside is
yellow when you first turn it.

19:06:34 From Doug Miller in N Kentucky to Everyone:
This is very dark before, during, and after turning.

19:06:58 From Matt Harber to Everyone:
Post picture(s) on facebook and tag me...

19:07:01 From Doug Miller in N Kentucky to Everyone:
Only the shavings are yellow

19:07:45 From Doug Miller in N Kentucky to Everyone:
