I want to share an Inexpensive measuring gauge tool from JOANN to share.
It measures from 1/8 to 2 inches. Only \$5,99. Then get a 50% off
coupon before you buy.

17:24:01 From Tim Hatch Bastrop, TX:
Thanks Andy... Have a Good night

17:24:20 From Joe Channey:
I like Sam Angelo's Formula of height X width X 2.5, whatever the shape,
then adjust the 2.5 number up for those times you make a special piece.
I have a times 3 or a 3.5 number on a special piece. Nice wood will cost
in the range of \$10 a board foot to buy. Free good wood is getting hard to find.

17:25:15 From Tim Hatch Bastrop, TX:
Thanks Joe that is great info

17:25:51 From Matt Harber:
There's a lot of different formulas for pricing. For bowls, the market will
set a basic price. Most everything else is pretty arbitrary.

17:29:26 From Doug Miller in N Kentucky:
I have a couple things for gallery
