Night Jim

19:00:15 From Dane Chandler -Tucson AZ to Everyone:  
so the problem with starting small & going big with a forstner is you lose  
that center support on the next larger size. you don't want to do that.

19:01:10 From Doug Miller in Kentucky to Everyone:  
I was thinking the same thing. Small to large for twist bits is correct.

19:01:29 From Dane Chandler -Tucson AZ to Everyone:  
exactly.

19:01:29 From Doug Miller in Kentucky to Everyone:  
Just not with Forstner bits

19:01:51 From Matt Harber to Everyone:  
Seems to work all right for me, with forstner bits, when I'm doing it on the lathe.
