Is anyone else's video jittery, or is it just me???

20:11:58 From Kade Bolger, Woodturner to Everyone:

mine's fine

20:11:58 From Andy Schuster to Everyone:
mines jittery as well, still good demo

20:12:22 From Karl Geary outside Atlantic City-NJ to Everyone:
video is good, audio is low

20:13:19 From Scott Hampton, Visalia, California to Everyone:
I think I need to sign out and then come back in. The video on my end
is real jittery.

20:13:38 From Billy Burt - Alamo City, Texas to Everyone:
It's fine on my end

20:14:28 From Henry Hogge to Everyone:
What's he making?

20:14:54 From Tommy Schutz to Everyone:
An angel

20:15:38 From Tommy Schutz to Everyone:
This step is the wings

20:16:42 From Scott Hampton to Everyone:
The video is somewhat better now on my end.

20:17:13 From Tommy Schutz to Everyone:
Turning at 2000 helps avoid catches when turning with the drilled holes in a he wood

20:21:52 From Scott Hampton to Everyone:
I don't like being the safety police, but I'd be worried about wearing these type of gloves while turning.

20:24:25 From Matt Harber to Everyone:
I agree, Scott....

20:27:41 From Chris Neilan to Everyone:
Good to see someone who knows how to use a Shopsmith

20:28:55 From Don Norton to Everyone:
Yes its nice to see a craftsman who knows his machine

20:29:32 From Scott Hampton to Everyone:
While turning I generally wear a smooth leather glove with the fingers cut off on my left hand due to my skin's sensitivity to the wood shavings. Cloth gloves can catch on the wood and cause an injury.

20:30:37 From Scott Hampton to Everyone:
I learned how to turn wood on my Shopsmith, and I still use it for turning from time to time.

20:31:10 From Chris Neilan to Everyone:
Me too, I have four of them

20:31:15 From Cap'n Eddie Casteliin, moderator to Everyone:

I'm cautious about gloves, but some turners need them not only for comfort, but to overcome other health issues.

20:31:57 From Andy Schuster to Everyone:

well folks, bedtime for me. see yinz next week. Thanks for the demo Bob. looks great!\

20:32:04 From Scott Hampton to Everyone:

I had three, but had to sell two of them because I was running out of room in my shop. □

20:32:43 From Scott Hampton to Everyone:

I still have all my Shopsmith accessories and gadgets.

20:32:50 From Doug Miller in Kentucky to Everyone:

I have two ShopSmiths. I to started this foray into turning on a Shop Smith. Good matching that is capable of turning nice work.

20:33:04 From Chris Neilan to Everyone:

What is that brace on the Morse taper extension?

20:33:26 From Doug Miller in Kentucky to Everyone:

On the tail stock?

20:33:36 From Scott Hampton to Everyone:

That looks like a custom made tailstock extension.

20:33:56 From Scott Hampton to Everyone:

Shopsmith doesn't sell them.

20:34:23 From Doug Miller in Kentucky to Everyone:

It's not an extension. This tail stock does not move. The moving qu il is in the head stock.

20:34:24 From Chris Neilan to Everyone:

Wonder where he got it...

20:34:59 From Chris Neilan to Everyone:

I realize that, Doug... I have a few! But not that piece

20:35:09 From Tommy Schutz to Everyone:

Bob makes it all

20:35:11 From David Carter to Everyone:

Everything on his shopsmith is handmade to his fit

20:35:17 From Doug Miller in Kentucky to Everyone:

Sorry, yes he has an extension with a small brace. Probably made it b

20:35:26 From Chris Neilan to Everyone:

Very cool!

20:36:09 From Scott Hampton to Everyone:

It's an extension that allows more room between the tailstock attachment and the piece you are working on. Great idea.

20:36:41 From Chris Neilan to Everyone:

Yes, great idea

20:38:21 From Scott Hampton to Everyone:

I'm still having trouble with the video skipping about.

20:38:36 From jim selby jacksonville fl to Everyone:

me too

20:38:57 From Tim Cook to Everyone:

Good night Jim,

20:58:10 From Dave Rhodes - Crescent City to Everyone:

I would appreciate if someone mailed a copy of the chat to me at david@crescentcitywebs.com at the end of the evening. My computer went down just now and I had to rejoin, so, I will only get a copy of the chat from this moment forward when I save the chat at the end of the evening.

20:58:56 From Scott Hampton to Everyone:

Dave, the chat will be available on the website.

20:59:59 From Dave Rhodes - Crescent City to Everyone:

21:10:12 From Kade Bolger, Woodturner to Everyone:
Great Demonstration Bob! Thank you.

21:10:49 From Ron Radliff to Everyone:
Nice job, Bob. I like your halo idea better than the wood ones.

21:11:48 From Dave Rhodes - Crescent City to Everyone:
Great Demo Bob

21:14:07 From Tim Hatch Bastrop, TX to Everyone:
Bob can you explain the grounding strap on your Wrist when you get a chance after the demo

21:14:16 From Matt Harber to Everyone:
The Beall Buff System documentation says it is designed to be operated at 1725 RPM.

21:14:48 From Matt Harber to Everyone:
Grounding strap: buffing generates a static charge, grounding strap dissipates the charge.

21:15:08 From Scott Hampton to Everyone:
That depends on the size of the buffing wheel. the smaller wheels need to run faster.

21:15:54 From Tim Hatch Bastrop, TX to Everyone:
Ah like the ole static probe for air mobile ops... got it

21:16:16 From Matt Harber to Everyone:
Thanks, Bob!

21:16:25 From Dave Kingsley - Lakewood NY to Everyone:
