Here are my notes on the wood vaporizer :
DIY Graeme Priddle Style Wood Vaporizer System
Uses a battery charger and nichrome wire to create a wood burner.

Nichrome resistance wire
https://www.amazon.com/TEMCo-Nichrome-wire-Gauge-Resistance/dp/B00WFA6002/ref=sr_1_2?hvadid=634142431094&hvdev=c&hvlocphy=9027230&hvnetw=g&hvqmt=e&hvrnd=3585169426911044625&hvtargid=kwd-144310543477&hydadcr=25938_13574256&keywords=18+gauge+nichrome+wire&qid=1680903166&sr=8-2

The branding is done with an 18-gauge nichrome wire coiled about 4-5 times, using Graeme Priddle's branding method. Special thanks to Molly Winton & John Lucas for his instructions on developing the oil pen.

Very little Ward.

17:40:24 From Robin's Buys And DIYs to Everyone:

17:40:59 From Doug Miller iPad to Everyone:
Using water or oil to lubricate as you sand

17:43:32 From Matt Harber (Highland, MI) to Everyone:
Replying to "Dimensions and marki..."

Dimensions: The long piece fits between your chuck jaws (because that's how you're holding it). The tick marks on the top are about 1/4". The round piece is marked every 15°.

17:59:38 From Doug Miller in Kentucky to Everyone:
Billy, you're making those cuts with a gouge. Could you make those same cuts with a skew?

17:59:44 From Dane Chandler - Tucson AZ to Everyone:
And then end of day they were told their not needed/don'tfit in....best of luck in your future endeavors

17:59:47 From Matt Harber (Highland, MI) to Everyone:
It's best to start a cut in an uncut space. It can mess with the previous cuts if the new cuts coincide.

18:00:43 From Robin's Buys And DIYs to Everyone:
No, they still work there, they are good employees, no one really cares, it's fashion now

18:00:49 From Heather Budarick to Everyone:

18:01:08 From Ward Wilson to Everyone:
is it better to use double sided tape or hot glue?

18:01:31 From Jim Duxbury, NC to Everyone:
I cut with a 1/4" skew laid flat

18:01:36 From Matt Harber (Highland, MI) to Everyone:
The 2-sided carpet tape from Ace Hardware seems to work the best.

18:01:45 From Dane Chandler - Tucson AZ to Everyone:
Both work Ward. But not the white stick craft glue stick

18:01:53 From Robin's Buys And DIYs to Everyone:
I think it would be tough to get it off using hot glue, I use hot glue with wood all the time and it is strong

18:02:03 From Matt Harber (Highland, MI) to Everyone:
I've used both the skew and a three-sided tool.

18:02:24 From Matt Harber (Highland, MI) to Everyone:
I showed a bunch of different tools in my own demo of the Joyner jig.

18:02:31 From Dane Chandler - Tucson AZ to Everyone:
Acetone or DNA put one hot glue makes it [almost] fall off by itself

18:02:34 From Robin's Buys And DIYs to Everyone:
Cool, Matt!

18:02:35 From Scott Hampton to Everyone:
Hey Everyone, I'm giving the meeting demo on Wed. May 10th. I'll be showing to make a candy dish with a textured and torched wide rim highlighted with colored waxes, and with the back and bowl finished with a high-gloss wax. Hope all of you can make it.

Not in high end positions or doesn't work that way. You don't misrepresent yourself in the beginning & then show something else. It's not for all position unfortunately.
