I bent an old screwdriver about 20 degrees and sharpened it similar and you can work right up almost to the tailstock point

Reacted to "I bent an old screwd..." with

Replying to "Also a recess limits..."

Not really. My recess' usually are no deeper than an 1/8" of an inch. If you are turning a shallow bowl, a tenon causes you to lose more wood than a recess will, making the bowl even more shallow.
