A question regarding Static Electricity: While using the Beall Sys with 3 wheels, I get some very good shocks. I wear rubber sole shoes and stand on an anti fatigue mat. These shocks are VERY upsetting. Only happens with Beall Sys. Any thoughts on how to stop the shocks? This is electrostatic discharge, and it can raise cane with electronics ... I killed a Nova lathe with and ESD shock while buffing a bowl with the Beall system a few years ago. Now I wear one of the wrist-straps linked above!
