outside of a vac chamber you are only going to harden 2mm of wood

16:51:26 From Doug Miller in Kentucky:
Replying to "I do have one questi..."

Thin CA works great. Sanding will work as well but you have to add more coats to get a solid stable surface.

16:51:45 From Joaquin Juatai:

slicing cuts until you are 4mm from final form....then thin CA

16:52:34 From Joaquin Juatai:

You can also stabilize with sanding sealer, but its similar to CA - you hit it, take a few light cuts, hit it again.
