Making your own carving stand

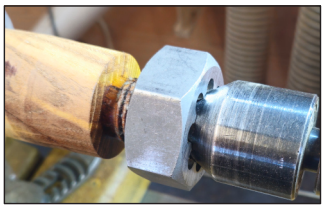

By Patrick Hoggard

Materials List, Unit of Measure = Inches

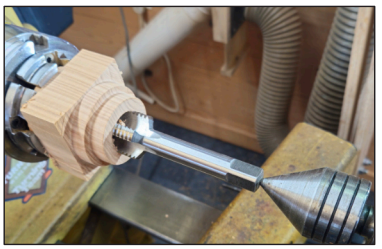

- 1 - 2 x 2 x 5 Blank, Threaded Ball Hitch
- 1 - 3 x 3 x 3 Blank, Ball Hitch Base
- 1 - 4 x 12 x 3/4 Base
- 2 - 2 x 6 x ¾, Uprights
- 1 - 1/2 x 1 1/2 x 4 Blank
- 1 - 7/8 x 2 x 3/4
- 5/16 x 4" Carriage Bolt, Washer and Nut
- 1/4 x 4 1/2 Carriage Bolt, Washer and Nut
- 5 - 1 1/2 Pocket Hole Screws

Mount the 2 x 2 blank in the chuck and turn a tenon 1 inch long by 1 1/4 inch diameter and thread the tenon with a [Beal] 1 1/4 x 8 TPI die.

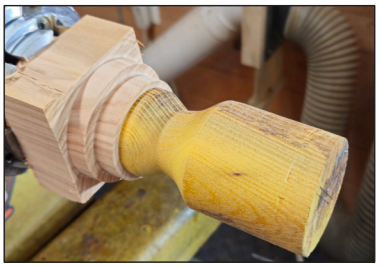

Mount a 1 7/8 x 2 x ¾ block of wood, turn top profile, and drill a 1 1/8" hole; then thread with a [Beal] 1 1/4 x 8 TPI tap.

Screw the blank into the block and turn a sphere on the end.

For the 2 x 6 x 3/4 uprights, measure from the top 1 inch down. Remove 2 jaws from the chuck and mount the upright and turn a shallow cove. Repeat for the second one.

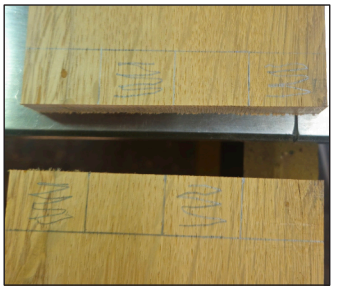

Turn the cove to match the sphere. Measure down from the top 2 1/2 inches from the top and drill a 5/16 inch hole in both uprights for the clamping bolt. Round the top of the uprights.

Mount the 1 1/2 x 1 1/2 x 4 inch blank and turn a 1 inch dowel 3 1/2 inches long. Mount the 1 7/8 x 2x 3/4 blank in the chuck and drill a 1 inch hole 1/4 inch deep in the center. Drill 3/16 inch hole all the way through.

For the 4 x 12 x 3/4 base, measure 1 inch in from the end, drill a 1 inch hole in the center. Measure 3 1/2 inches from the same end and draw line across. Measure 3/4 inch on each side of line you just drew and draw a line across each one. Mark out 4 equal segments between the two outer lines. Take the base to the band saw a cut down the center line.

Fit the 2 pieces together and mark the center of the hinge and drill a 1/4 inch hole all the way through.

Drill and tap a hole for a ¼ x 20 TPI screw in the end of the base where the 1 inch hole is to lock the dowel. Turn a small knob for the 1/4-20 screw and epoxy it on.

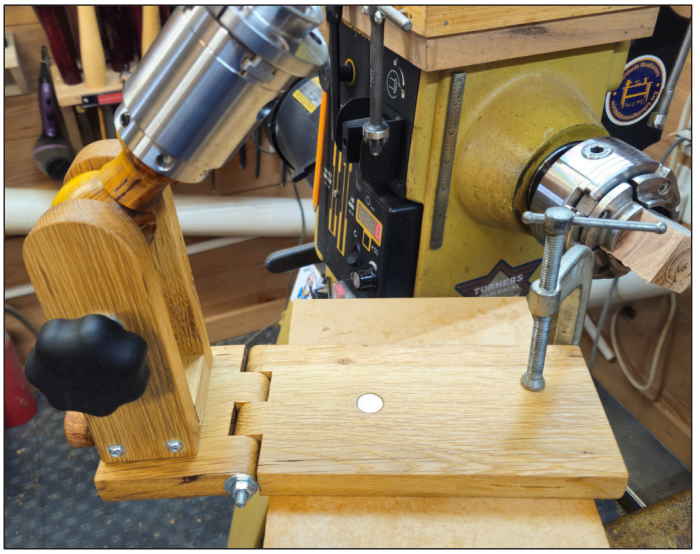

Cut out every other segment on the long piece; cut the opposite two segments on the short piece. Sand or trim to get a snug fit.

Round over the ends of the hinge so it swivels up and down.

All that is left is assembly. Glue and screw the dowel into the hole on the 1 7/8 x 2 x 3/4 stand base. Insert the sphere in the coves of the uprights and insert the 5/16 x 4 carriage bolt through both uprights and install washer and nut, place the 1 7/8 x 2 x 3/4 piece at the bottom of the uprights and glue and screw together. Insert 1/4 x 4 1/2 inch bolt through the hinge and install washer and nut.

A demo on how to do this will be done on November 18, 2026, so mark your calendars!

Enjoy!
